

Another Plumber

A simple guide to help you
choose the best boiler for
your home.

About Another Plumber

Another Plumber is a gas safe registered company that specialises in the installation, service and repair of gas appliances in the West and South Yorkshire area.

Over the years, Another Plumber has built up a large clientele of customers based purely on customer recommendations and regular clients. Starting from humble beginnings and one man's aspirations, Another Plumber has built a business with a reputation based on professionalism, efficiency and friendliness.

Professionalism

Another Plumber strives to provide a professional service from the moment your enquiry is made to the excellent aftercare service we provide; customer satisfaction is always our number one concern.

Efficiency

Another Plumber understands that often our job role will have an impact on the daily routine of our valued customers. Therefore we strive to make all contact and interactions as efficient as possible. We do not want to disrupt customer lives more than necessary and so provide the most efficient service so that we can minimise any disruptions to your daily routine.

Friendly

Another Plumber's friendly service and disposition drives our business. We always provide customers and business suppliers with a friendly service to ensure 100% customer satisfaction.

With Another Plumber you are guaranteed an engineer who is Gas Safe registered, DBS checked and fully insured for every job we undertake. Offering a **professional, efficient and friendly** service at an affordable price.

Another Plumber recommends the following Boiler(s) that are suited to your home:

Combination Boilers

Combination (combi) boilers are the most popular type of boiler in the UK due to their smaller size and being more economical than other boiler types. Our combi boilers are compatible with all fuel types (gas, oil and lpg) and come with up to a 10 year guarantee.

Heat Only Boilers

Heat only boilers are more traditional boilers, use hot water cylinder as well as a cold water and additional storage tank, usually in the loft space. A good option for replacing existing old boilers without updating the entire central heating system.
